

Students from Singapore's Temasek Polytechnic had an Remarkable Experience at Galgotias University.

On 7th May 2024, the students from Temasek Polytechnic have visited Galgotias University. The University welcomed students from Singapore's Temasek Polytechnic for a thrilling Cultural Exchange. This helped the students to get into a great culture exchange and having a great educational exposure. In an enriching cultural convergence, Galgotias University welcomed students from Temasek Polytechnic, Singapore. The visit proved to be an extraordinary learning journey, brimming with insights and experiences. They have seen the environment and have experienced a great thing at Galgotias University; they also had a chance of experiencing and learning various things from Indian culture. The Singaporean students immersed themselves in Galgotias' vibrant campus environment, delving into various facets of academic and cultural exchange. A highlight of their visit was a tour of Galgotias' cutting-edge facilities, including the renowned iOS development center established in collaboration with industry giants, Apple and Infosys. Beyond mere sightseeing, the students actively engaged in Galgotias' dynamic learning pedagogy, exchanging ideas and perspectives with faculty members and fellow students. The interaction fostered intellectual growth and nurtured invaluable cross-cultural understanding and collaboration. The visit stands as a testament to the power of educational exchange in bridging geographical boundaries and fostering global citizenship. It was a memorable experience that left an indelible mark on all involved, symbolizing the enduring bonds of friendship and cooperation between two esteemed educational institutions from different corners of the globe. The exchange visit between Galgotias University and Temasek Polytechnic was more than just an academic engagement; it was a celebration of cultural diversity and international camaraderie. The students from Temasek Polytechnic had the opportunity to participate in various cultural activities organized by Galgotias University. These activities not only enriched their understanding of Indian culture but also provided a platform for meaningful intercultural dialogue. Moreover, the collaborative workshops and seminars held during the visit allowed students from both institutions to share their knowledge and experiences, fostering a spirit of innovation and creativity. The Singaporean students were particularly impressed by the entrepreneurial initiatives and research projects at Galgotias University, which inspired them to think critically and embrace new challenges. The visit concluded with a formal ceremony where students exchanged tokens of appreciation, symbolizing the lasting friendships and professional networks they had formed. Representatives from both institutions expressed their commitment to continuing this partnership, with plans for future student exchanges, joint research projects, and virtual collaborations. As the students from Temasek Polytechnic departed, they carried with them not only new academic insights but also cherished memories of their time in India. The experience underscored the importance of global educational exchanges in preparing students to become well-rounded, globally-minded individuals capable of contributing positively to an interconnected world. The visit of Temasek Polytechnic students to Galgotias University was a resounding success, highlighting the transformative power of cultural and educational exchanges. It paved the way for continued collaboration and mutual growth, strengthening the ties between Singapore and India, and enriching the educational experiences of students from both institutions. This memorable event will undoubtedly inspire future initiatives aimed at fostering global understanding and cooperation among young scholars.

An Expert Talk With the Alumnus - Entrepreneur World

“Business opportunities are like buses, there’s always another one coming”, the most important thing to kept in mind during the graduation period and the duration of your business set up. To this, School of Business hosted an entrepreneurial session with one of the alumnus of our university, Mr. Robin Gupta, a BBA graduate from our college of batch 2015. Robin Gupta, the mind behind Conscious Chemist gave the students a chance towards an interactive session on 1st May 2024. Galgotias University experienced a surge of entrepreneurial enthusiasm and a proud moment during the “Entrepreneurship Talk Series: Vision to Reality” where our expert shared his ideas, journey, and the way to Shark Tank India. His company Conscious Chemist is a brand under the legal entity Era Botanics Private Limited, and is making waves in the beauty and personal care industry. The company is gaining attention for its innovative skin care products and it’s recent appearance in the television program Shark Tank India. To this the expert added, that with a unique product lineup and strategic investments, the company is

poised for growth. While they may not have secured funding from Shark Tank India, their financial metrics and commitment to innovation suggest that they are a brand to watch in the coming years. He interacted up with the students, asking their potential ideas for the market. He even stressed upon the key points of business which includes product knowledge, marketing, competition analysis, structure, funding and many more elements which make up to a stabilized business plan. Robin’s discourse offered invaluable insights into the journey

from conceptualization to realization, exposing students with the intricacies of designing a business model and procuring humongous fundings for the same, resonating deeply with attendees. His talk served as a beacon of inspiration, urging students and faculty to embrace their entrepreneurial aspirations with conviction. We extend our sincere gratitude to Robin Gupta for delivering a profoundly enlightening session that is poised to ignite numerous entrepreneurial pursuits!

Galgotias University Celebrates Maharishi Parshuram Jayanti

Greater Noida , On 3rd May Galgotias university hosted a memorable event to commemorate Maharishi Parshuram Jayanti. This event unfolded at conference hall in university and was organised by professor Arvind kumar , the program officer of NSS unit-1 . The event was attended by notable figures including Dr. Sunita Yadav , Dean of the school of computer science and engineering ,Dr. Vineeta khemchandani , Dean of school of computer application and technology , along with departmental coordinators Tara chand and Anurag gupta along with 50 dedicated NSS volunteers . The highlight of the event was a captivating speech delivered by esteemed professor, Ambika prasad pandey whose profound insight shed the light on the timeless teaching and values exemplified by Maharishi Parshuram. Professor pandey’s expressiveness and knowledge deeply resonated with the audience capturing their attention and fostering a

sense of honour for the great figure . Throughout his address, professor highlighted the impact of Maharishi Parshuram’s teaching about embracing knowledge, righteousness and courage. He drew parallels between Parshuram’s life and the challenges faced by the society. His discourse highlighted the relevance of Maharishi Parshuram’s teaching in everyone’s life in today’s world. And at the end of the event, participants expressed their gratitude for the oppor-

tunity to come together and honor the legacy of Maharishi Parshuram. The event served as a reminder of timeless wisdom and values and the atmosphere was filled with a sense of unity. The program ended with a vote of thanks delivered by professor Arvind kumar. He acknowledged the effort of everyone, from guest to volunteers for making this event successful and expressed his appreciation for their contribution in the event.

An Engaging Session Towards the Benefits and Career Achievements of Connecting to IEEE Society

On May 1, 2024, during the ‘Unlock Career Opportunities: Session on the Benefits of Joining the IEEE Community’, Prof. Yogesh Singh Chauhan (Ph.D.), a faculty member at IIT Kanpur and an IEEE specialist was hosted by Galgotias University. He also gave a wonderful speech. The name of his talk was “Job Outlook and Benefits of Joining the IEEE Community”. Professor Chauhan engaged with the university administration as well as students from diverse fields, prompting an event full of intellect and excitement. His discourse mainly focused on outlining the advantages of being an IEEE member. Various career paths available to people who participate in this society were explained during the seminar this enlightening those present including teachers and learners. It was emphasized that professional networks play a vital role in today’s competitive business environment given that individuals must keep on learning throughout their lives. This issue is at the core of professional organizations in education and business development. In addition, he pointed out that apart from academic qualifications one needs to have skills such as interpersonal relations which are developed through working with others closely so as achieve common goals more effectively especially now when there is so much competition globally; hence students wanted to know how these could be attained practically within different organizations worldwide. The debate has called into question the significance of professional associations in academia and business advancement. The professor’s talk showed various job paths and prospects that students can explore through engagement with the IEEE community. According to him, it is essential to create strong networks and be always prepared to acquire new skills which will help us survive in this highly competitive world. Both students as well as their teachers find such exposure invaluable since they can integrate what has been learnt and achieved. It is not just about transferring information; it is an occasion that encourages one to always discover new things as well as develop an attitude of collaboration throughout their lives. It was also focused on the necessity of being involved in professional societies which have benefits both for professional and personal life. This is an activity that supports building a university team lifetime skill. The sustainable development goal which was achieved by Galgotias University through this session is the “Quality Education” goal which focuses on providing education which makes people compelled with knowledge, skills and value which a responsible person would need to contribute to society. and the “Partnership for the goals” which requires efforts of stakeholders from both public and private sectors as well as from civil societies, what is more, collaboration among various actors ensures faster progress towards sustainable development due to pooling together of capitals and expertise. The session marked another successful event for the students which helped in enlightening their path to success, organized by Galgotias University to help them achieve their desires.

International Biomedical Laboratory Day Celebrated at Galgotias University

Anchor inviting the guest of the event

On 3rd of May, 2024 Galgotias University, Department of Medical Laboratory Technology organized International Biomedical Laboratory Day. International Biomedical Laboratory Day was initiated in the year 1996 under the the Department of IFBLS, World Congress situated in Norway. Biomedical is basically a field of Research which determines the effective usage of drugs and medicinal techniques on living organisms. This day is celebrated every year in order to concede the effective role of Biomedical Laboratories and their staff workers in diagnostic and healthcare of people. These potential workers perform several tests, experiments and various analysis in order to diagnose a patient's disease and provide necessary remedies to cure it. The day

aims to recognize the importance of Biomedical Laboratories on prevention of diseases, healthcare as well as advancement in the Medical field. In order to showcase the effective role of workers, the day organized various events, seminars and workshops every year highlighting technological advancements in Laboratory and optimizing career opportunities in the Biomedical field. Various educational institutions often conducted campaigns to inform the public about the significant role of Biomedical Laboratories. Social media announcements, informational brochures and public health announcements were involved as a part of this campaign. Even some of the organizations hold remembrance ceremonies to honour these Laboratory workers. The theme idea

Lamp-Lighting ceremony

behind this day is the collaboration of Biomedical researchers with healthcare which in turn, fosters innovation, helps to improve condition of patients and explore more and more Scientific discoveries. Biomedical Laboratories also have a major role in to maintain accuracy, reliability, high quality standards with respect to testing and analysis. It encourages professional development includes training, certification programs and various Scientific conferences. Biomedical Laboratories played a pivotal role in the field of public health initiatives like; outbreak investigation), surveillance of diseases and development of vaccines. In the case of pandemic and health emergencies, these Medical Laboratories have a significant global impact. Many in-

novations and creative discoveries were originated from Medical Laboratories. Although these diagnostic tests, therapeutic interventions improves the condition of patients. It promotes global collaboration and shared knowledge among Laboratories, Scientific researchers as well as professionals of healthcare Department. Moreover, the collaboration is usually important, in order to address challenges of global health issues and advancement in Scientific field. Overall, the event was organized in C-block campus of the university under the mentorship of Avinash Kumar (Department of Medical Laboratory Technology) and ended up in a soulful note.

Felicitation ceremony

Introduction of the programme

Galgotias University Aviation Students gets Hands on Practical Training Under FWSTC

Students of bba and mba aviation of Galgotias university have an awesome experience as they underwent practical training recently at fly wings simulator training centre (fwstc). The core curriculum for BBA and MBA aviation programs focuses on the business side of the industry, encompassing areas like finance, marketing, and operations. However, integrating elements of simulator training can bridge the gap between theory and practice, providing students with a deeper understanding of the operational realities of aviation and this need was acknowledged by galgotias university as students of galgotia's university got practical training in safety, emergency response and security measures in aviation at fly wings simulator training centre. During their time at the Flight Training Centre, they had the opportunity to apply everything they had learned in the classroom to real-world flight scenarios. Students participated in simulated scenarios that involve managing airport ground operations, such as scheduling aircraft arrivals and departures, optimizing baggage handling, and ensuring efficient passenger flow. The facilities had a dedicated area to simulate in-flight medical emergencies with an aircraft cabin simulator. Exposure to simulated emergency scenarios, such as bad weather diversions or security breaches, can provide valuable insights into the critical protocols airlines implement

to ensure passenger safety and business continuity. They understand how they had to properly assess situations, utilize emergency medical equipment, administer first aid, communicate with air traffic control and operations, and determine whether to divert for emergency landing in the training by the experts in the industry. Which helps the students to be industry ready as they have an equal level of practical experience to apply their skills they learn as a student. At the training centre a team of experts was provided to the students to ask questions related to the aviation field which they had in mind which the experts answered with joy. So overall Galgotias University understands that

aviation programs are the focus area of school as industry is growing and so should the program of the college. It also aligns with the school's thrust on experience learning. And this training will help students to enhance their learning, improve decision making skills and also helps in improving communication which is crucial skills for aviation management. The main focus and mission of the college is not to give only theoretical knowledge to their students which will only help them excel at the university level but the university wants their students to excel in the industry and for that practical knowledge and training is more important than theoretical knowledge.

Celebration of International Nurse Day at Galgotias University

Jury evaluating models

Every year on May 12, the world comes together to celebrate International Nurse Day, honouring the incredible contributions of nurses to global healthcare. This year Galgotias University school of nursing also organized an anatomical model and disease pathology exhibition competition on 12 May on the occasion of International Nurse Day to recognize the dedication and compassion of our future nursing professionals. Galgotias University focuses on expressing the deepest gratitude to the nursing students who are diligently preparing to enter this vital field. This exhibition was showcasing the knowledge and skills of nursing students in understanding both human anatomy and disease management. This event featured intricate anatomical working models representing various body systems alongside exhibits explaining different disease pathologies and their management strategies which helps other students to understand the basis of human anatomy because there are working models in the exhibition to under-

Hemo Dialysis working model

stand the complexity of human body and its anatomy. Students demonstrated their understanding of anatomical structures and disease processes through visually engaging displays and informative presentations. At the end of exhibition judges evaluated the exhibits based on accuracy, creativity, and the clarity of explanations provided. This competition creates a engaging learning environment, which allows students to exchange ideas and deepen their understanding of both anatomy and disease management. At the end of the exhibition winners were awarded by the jury. International Nurse Day at Galgotias University is more than just a celebration, it's a day for reflection and inspiration. It's a day for our nursing students to solidify their commitment to this noble profession and envision the positive impact they will make on the healthcare system and at the end of the event everyone encouraged the future nurse for better future and appreciate the future healthcare heroes for working hard and save the life.
